

IMAGESOURCE ANNOUNCES ATLE SKJEKKELAND, VICE
PRESIDENT OF AIIM, AS THE FEATURED KEYNOTE AT NEXUS 09

Olympia, WA, August 20, 2009 – ImageSource is pleased to announce their featured keynote for Nexus® 09, Atle Skjekkeland, Vice President for the [Association for Information and Image Management \(AIIM\)](#). Mr. Skjekkeland is responsible for AIIM's research and educational offerings world-wide and also oversees AIIM's Certification Programs.

Nexus is ImageSource's annual [ECM Solutions Conference](#). The date for this year's educational event featuring the latest technology around Enterprise Content Management is November 2-3, 2009, with post-conference training on November 4.

The two-day conference will be held at the Meydenbauer Convention Center in Bellevue, Washington. In light of the tough economic times, "Economize Your Business Process," was chosen as the theme for Nexus 09. Keynotes and breakout sessions will address how businesses can be both efficient and cost-effective.

Nexus provides education that can position organizations to take the best advantage of new opportunities when they arrive by learning about new trends, new solutions, and new methods. When the economy rebounds, organizations who have prepared will be able to move quickly and move ahead of the competition by deploying new and innovative ECM strategies.

"This is the year to attend Nexus," said Terry Sutherland, CEO, ImageSource. "World-class speakers, valuable content and information, and the most current technology will all be showcased at Nexus. This conference has become the northwest's premier content management event for networking and education."

Nexus 09 attendees will have the chance to network and learn from professionals and experts, as well as have the opportunity to exchange information and ideas with peers. Ideas and solutions will be presented that have proven successful for Fortune 1000 companies and a variety of different verticals, including health care, government, higher education, finance and banking, as well as others. Presentations will include information on project management, industry trends, the latest technology, case study examples, technical breakouts and more.

Because of the high degree of educational content offered at Nexus, ImageSource is offering 12 Professional Development Units to Project Managers with PMP Certification. Nexus 09 will also provide ICRM CMP Maintenance Hours for Certified Records Managers and Continuing Education Units for those involved in the American Health Information Management Association (AHIMA). Additionally, IAPP members can use Nexus toward their membership.

Attendees from last year's conference said Nexus provided valuable information, as well as gave them insight as to how to better their businesses.

"Nexus was first class. It was a great opportunity to network with other document imaging and process management professionals, as well as industry service providers. I learned a lot attending the educational sessions."

- Tom Westfall, Vendor Application Support Manager, Office of Information Technology, Washington State Department of Transportation

"Nexus was a very professional conference. I enjoyed the vendor expo and got a lot of valuable information. I'm looking forward to Nexus 09!"

- Anthony De Francisco, Systems Administrator, T-Scan

Due to the amount of positive feedback from last year, evening entertainment will be once again provided at the Lucky Strike Lanes in Bellevue. Lucky Strike isn't your typical bowling alley. This modern venue offers great games and good food.
