

IMAGESOURCE ANNOUNCES THE DATES FOR NEXUS 2007 INFORMATION MANAGEMENT – REALIZE THE POTENTIAL

Olympia, WA, March 13, 2007 – ImageSource, Inc. proudly announces the dates for Nexus 2007, their ECM Solutions Conference. With the theme “Information Management – Realize the Potential” the dates are set for October 23-24, 2007.

The conference will be held at Bellevue’s modern, upscale Meydenbauer Convention Center. Increasing the breadth of information and content, the 2007 event is expanding to a two day forum.

Participants will benefit from independent industry experts, visionaries and leaders to provide education across a wide range of subjects designed to help maximize technology investments and to gain knowledge about complimentary technologies. Attendees will expand their network and resource base, tap into expansive industry experience, and discover what has been successful for industry peers. Processes, technologies and ideologies will be presented that have brought measurable benefits to Fortune 1000 companies, government agencies, healthcare organizations, financial institutions, and more.

The response from our Nexus 2006 attendees said that Nexus provided valuable content that would positively impact their business. Attendees surveyed said that the conference met and in most cases exceeded their expectations.

“...the event that ImageSource put on last week was spectacular! I’ve been to hundreds of industry events and this one definitely rates in the top two.”

– Shon Mueller, Regional Sales Manager Advanced Data Capture, Kofax

“The only difference between the quality of this event and an Oracle World event is that there aren’t 20,000 people here “.

– Steve Kissinger, Director of Accounts Payable, DHL

While the conference days will be filled with educational content, the event will also host a spectacular off-site event at the Experience Music Project in Seattle. Meals will be provided throughout the two day conference prepared exclusively by the chef from a favorite Northwest restaurant.
