

**IMAGESOURCE WINS BUSINESS SOLUTIONS' CHANNEL CONNECTION
AWARD AT AIIM 2008**

Business Solutions magazine recognizes ImageSource as a top integrator for its outstanding content management installation at a California-based utility company.

OLYMPIA, WA, March 05, 2008 — ImageSource, a leading provider of content management solutions and professional services, proudly announced today that the company has been honored with the Channel Connection Award from Business Solutions Magazine at the AIIM Conference in Boston. The award recognizes an outstanding content management technology installation that demonstrates integration complexity and delivers ROI.

The award-winning implementation is a document imaging, workflow and JD Edward integration that centralized the accounting process for a large California-based utility. The ImageSource initiative designed a comprehensive content management solution to bring efficiency and functionality to the Utility's accounting system. This is the fourth consecutive year that ImageSource has received a Channel Connection Award.

The solution utilizes the ImageSource ILINX Application Integration Kit to integrate Oracle IPM (imaging and process management) with JD Edwards. Now centralized, invoices are sent to the Company's headquarters where Fujitsu 4340 and 5120 scanners are used in conjunction with Kofax Ascent Capture for the new imaging processes.

Through workflow automation, the new system increases the control and visibility of invoices throughout the Accounts Payable process. They have increased departmental efficiency with the ability to monitor staff production levels, create a better distribution of workloads, identify bottlenecks and track invoices on the spot. The Company is seeing continual growth. They've had a 20% increase in the number of invoices in the past year, without having to increase staffing. The system has also improved cash flow and vendor relations by expediting the process for approving invoices.

"Now that we are centralized, we have one set of internal processes, we have control over our invoices and handling payments is much easier," states the company's IT Project Director. "The ImageSource Professional Services team bent over backwards to ensure that they satisfied our request."

"I'd like to thank this Utility for their forward thinking and drive to improve their accounting system. Through our continuing partnership, we look forward to leveraging their new enterprise infrastructure for efficiency improvements in other departments," said Shadrach White, Chief Technology Officer, ImageSource Inc. "Each member of the ImageSource Professional Services team worked cooperatively with the company to benchmark the old system and figure out how to automate their AP processes. Our team's thorough analysis and implementation provided a seamless transition to the new system."

Vicki Amendola, *Business Solutions'* document and content management editor, presented the award today at a special ceremony held at AIIM Expo 2008 at the Boston Convention & Exposition Center in Boston.
