

IMAGESOURCE OFFICIALLY LAUNCHES NEW ILINX CONNECTORS FOR ORACLE IPM/UCM AT IMAGESOURCE OPEN HOUSE & TECHNOLOGY EVENT

The New ILINX SharePoint connectors for IPM and UCM allows users to securely access Oracle Imaging and Process Management and Oracle Universal Content Management content through Microsoft SharePoint.

OLYMPIA, Washington — May 2, 2008 — ImageSource, a leading provider of content management solutions and professional services, today announced the official release of the ILINX SharePoint Connector for IPM and the ILINX SharePoint Connector for UCM. Celebrating the release, ImageSource is hosting a Microsoft Technology Event and Open House at their Olympia headquarters.

The new ILINX connectors work with Microsoft Office SharePoint Server 2007 to provide a pervasive platform capable of seamlessly accessing content from within the Oracle IPM or UCM repository. This easy-to-deploy Web Part maintains the valuable familiarity and features of IPM, from advanced search capabilities to security parameters.

“The ImageSource ILINX products are developed to enhance existing technologies,” said Shadrach White, Chief Technology Officer, ImageSource. “The ILINX SharePoint Connector for IPM/UCM allows customers to leverage the familiar Microsoft Office environment to harness the benefits of their Oracle investments. By bringing these technologies together customers will have a unified, easy-to-use platform for accessing their content, enterprise-wide.”

Utilizing ILINX, Oracle users are able to undergo the same user experience and recognizable search screen they are used to with Oracle content management. At the same time ILINX SharePoint Connector for IPM and the ILINX SharePoint Connector for UCM enable single sign-on, mapping credentials and security parameters to their IPM and UCM systems.

The new ILINX SharePoint Connectors for IPM and UCM are featured at the Open House Technology event. Full product demonstrations show how ILINX provides direct access to IPM/UCM without leaving the SharePoint environment. The Microsoft Across America Truck is on site with experts on board to share technology solutions and educate attendees about SharePoint. Touring the ImageSource headquarter location, guests meet with our Professional Services teams, participate in an executive roundtable, and are treated to lunch.
