IMAGESOURCE ANNOUNCES THE H1N1 CAPTURE PACKAGE TO HELP  
HEALTH CARE ORGANIZATIONS CAPTURE INFLUENZA DATA

*INFORMATION MANAGEMENT SOLUTIONS FOR H1N1 FLU GRANTS - THE  
SIMPLE, COST-EFFECTIVE WAY TO BE PREPARED*

**Olympia, WA, August 11, 2009** – ImageSource has developed the H1N1 ILINX Capture Package in light of the \$350 million available in grants to help states prepare for the fall flu season and the H1N1 Flu, or Swine Flu. \$260 million will go to Public Health Emergency Response and \$90 million to Hospital Preparedness, according to the U.S. Department of Health and Human Services. This package is available to help health care facilities and hospitals fulfill the requirements to track and submit vital information regarding the H1N1 Flu.

ILINX Capture facilitates the electronic management of any type of critical information related to the H1N1 Flu, including patient information, vaccination reports and other critical documentation. This flexible Web-based product allows users to capture document information anytime, anywhere, with the click of a button.

With ILINX Capture, users can capture and index large volumes of documents securely and efficiently. This product can also import and process emails, faxes and business documents, as well as automate complex capture and indexing tasks. To deploy 500 users, it takes only about one day, compared to one month with traditional scanning solutions.

“Health care organizations wishing to take advantage of these grants can use this technology to accurately maintain their H1N1 information,” said Shadrach White, Chief Technology Officer, ImageSource, Inc. “ILINX Capture is a Web-based capture application, and despite its multiple features, it’s easy to use and administer.”

In addition to being easy to use, ILINX Capture has a low, per-user cost and takes significantly less time to deploy than a traditional scanning solution, making it cost-effective. For more information about ILINX Capture, visit the ILINX Capture Web site at [www.ilinxcapture.com](http://www.ilinxcapture.com).

**About ImageSource**

ImageSource, Inc. is a leading provider of [ILINX technology](#), Enterprise Content Management solutions and integration services.
