

# Tribal Casino wins big with ILINX slots audit solution.

SUCCESS STORY / TRIBAL NATIONS / TRANSACTION MANAGEMENT

## Washington State Tribal Nation

### Strategic Initiative

A popular Washington state Tribal Casino maintained thorough records as part of its table games audit packet process. Its existing paper-based process required expensive physical document storage and made it hard to find and collaborate on data and reports. The Casino needed a secure, automated solution for compiling slot machine data, verifying amounts and payouts, and supporting accurate analytics and audit records.

### Solution Plan

ImageSource partnered with the Casino's IT department to scan the backlog of physical documents into ILINX Content Store. ILINX Capture was also implemented to index data and add search functionality. The solution ensured information security with role-based views. It also facilitated records retention and disposition using workflows.

### Investment Return

The Casino's ILINX solution now enables routine compliance with Title 31 and other gaming regulations. ILINX automation facilitates the table games audit packet process and all reporting required by federal and state regulators. Based on the proven success of ILINX Capture and ILINX Content Store, Casino administrators later added ILINX eForms to their tech stack.

#### ILINX CAPTURE AND INTELLIGENT WORKFLOW

This foundational workflow automation module lets you capture data quickly and easily from any source and any device. With no page-count licensing, capturing and utilizing data is fast and cost-effective.

#### ILINX CONTENT STORE

An intuitive, web-based repository for content storage, access, and management from any device. Centralized administration for faster deployment and robust content management.

### Process innovation made easy.

ImageSource makes process innovation easy through advanced solutions built on ILINX, the world's most flexible process-improvement platform, delivered by a team of experts committed to customer-partner success.
