

# Mazda leverages ILINX for successful ERP migration.

SUCCESS STORY / MANUFACTURING / TRANSACTION MANAGEMENT

## Strategic Initiative

Mazda North American Operations made the decision to update its enterprise resource planning software. However, Mazda knew the company itself would need better data capture and workflows to get the best results with the new ERP system. They needed a web-based imaging solution to enable centralized information management while integrating seamlessly with the new ERP.

“ImageSource gave us confidence they would meet our critical deadline to get the new ERP system up and running.”

Business Systems Analyst, IT Division, Mazda North American Operations

## Solution Plan

Mazda turned to ImageSource and ILINX to deliver a new data system on quick delivery. A comprehensive workflow redesign addressed compatibility issues between the company’s old and new systems. ILINX Capture extracted data from original documents, onboarded new content and supported eForms. ILINX Release integrated with the incoming ERP, allowing online access to records at any time during a transaction lifecycle.

## Investment Return

ILINX capabilities helped Mazda meet its critical migration deadline. Sophisticated workflows enabled quick data routing through Accounts Payable, resulting in more than 600 approvals daily and speeding the time between invoice receipt and processing. “ILINX technology was the key element to a seamless integration which maximized our ROI,” says Kevin Luck, IT Business Systems Analyst with Mazda.

### ILINX CAPTURE AND INTELLIGENT WORKFLOW

This foundational workflow automation module lets you capture data quickly and easily from any source and any device. With no page-count licensing, capturing and utilizing data is fast and cost-effective.

### ILINX RELEASE

Take content from capture and deliver it with full tracking, auditing, and logging to your business systems and workflow applications.

### Process innovation made easy.

ImageSource makes process innovation easy through advanced solutions built on ILINX, the world’s most flexible process-improvement platform, delivered by a team of experts committed to customer-partner success.
