

Easy-to-deploy unified data capture from any device.

Data vital to your organization is coming from everywhere at an accelerating pace. You're charged with getting it reliably and quickly into the processes that need it. The last thing you want is a complicated mix of hard-to-deploy-and-manage capture solutions. With ILINX Capture, configure once and deploy anywhere in a matter of minutes.

No more content capture silos

Forget about having to deploy and manage multiple systems with their own configurations. ILINX Capture unifies data capture across your enterprise, enabling you to configure once and capture data from mobile, desktop, MFPs, email, and more.

Digital transformation made easy

Electronic documents, such as PDFs, are easy to create but don't enable data extraction. ILINX Capture makes the transition to automated data onboarding easy by unifying configurations and workflows for traditional capture and user-friendly eforms.

Flexible, simple no-code workflows

Unlike traditional approaches that tie workflows to individual capture channels, ILINX Capture workflows are simple to design and operate across users, locations, and content types. This lets you reduce the risk of errors and monitor activities easily.

Technical Highlights

1. Desktop and workgroup scanners, mobile, MFPs, email, Fax, FTP, and Web
2. Unified workflow with drag-drop configuration
3. Process monitoring and real-time visualizations
4. No code REST APIs enable deep integrations
5. Integrate with ILINX eForms and replicate paper forms

Remote Staff Onboarding

Enable collection and coordination of data and documents for new hires.

Government Permitting and Licensing

Reliably initiate processes 24x7, collecting required information regardless of format, devices, or location.

Document Conversion

Transform documents from paper and electronic formats to organized, usable data that streamlines workflow.

Process innovation made easy.

ImageSource makes process innovation easy through advanced solutions built on ILINX, the world's most flexible process-improvement platform, delivered by a team of experts committed to customer-partner success.
