

An intuitive, powerful, web-based content repository.

Digital experience delivery hinges on your ability to provide critical content and data on demand. The lean, web-based architecture of ILINX Content Store is a secure store-and-search repository for all digital asset types. Users can access data from any device through a browser, while administrators control security and access from a central location. ILINX Content Store deploys in a fraction of the time it takes to configure a traditional solution.

Control searches, edits, and downloads

ILINX Content store supports web search and retrieval from any browser or device. Edit, annotate, redact, and share documents with full versioning capabilities. Content Store integrates with legacy databases and repositories, providing search and access to older files as needed.

Receive and onboard content intuitively

Onboard dozens of file types from a range of sources including scanners, mobile devices, legacy mainframes, email, and more. Drag and drop from desktop directly into the Content Store repository.

Quick no-code configuration and integration

Easily integrate ILINX Content Store with your existing business applications and deploy to any device. Administer and monitor the system from anywhere to enable content access with airtight security.

Technical Highlights

1. Multiple search options – including keyword, Boolean, full-text, and structured index
2. Documents and other content display directly in browser
3. In-place editing for Microsoft Office documents
4. Supports annotations, redactions, notes, etc.
5. Robust security and permissions tools enforce your policies and protect your data

Establish Version Control

Invite collaborators to contribute to a single shared document or master file.

Speed Lending and Accounts Payable

Consolidate files and documents to speed information through workflows. Secure content across the enterprise in a single environment.

Meet Compliance Standards

Establish user permissions rules to ensure the confidentiality of protected or private information.

Process innovation made easy.

ImageSource makes process innovation easy through advanced solutions built on ILINX, the world's most flexible process-improvement platform, delivered by a team of experts committed to customer-partner success.
