

Take your Indirect Cost Rate Proposal Process from months to days.

The complex, expensive, heavily regulated Indirect Cost Rate Proposal (ICRP) process is vital to a Tribe's success. Tribal finance teams are faced with the responsibility of annually preparing and submitting the ICRP's to the federal government in order to maintain funding and provide essential services to their members. ILINX ICRP automation streamlines this process, ensuring the best recovery possible and freeing up your team to address other critical job duties.

5-Step Automated Process

Months of work can be done in hours. The ILINX ICRP solution guides your financial team to complete a compliant, publication ready ICRP in 5 clear steps: Import, Group, Optimize, Review and Publish. Each step is traceable and archived in case of audit.

Maximize Your Recovery

Choosing the right methodology has long been high stakes guesswork. Select the wrong one and funding is left on the table. ILINX ICRP removes that risk by automatically calculating all three methods before submission so the best option can be visualized, adjusted, and chosen in real time.

Decreased Labor Burden

With a traditional ICRP approach, your teams are tied up for months, compiling, reconciling, and validating all the components into an OMB compliant package. With all that work done in hours, they can focus on other critical duties that benefit Tribal members.

Technical Highlights

1. Turbo Tax-style guided interface
2. Automated reconciliation and validation
3. Visual decision-making tools
4. Built-in compliance documentation
5. Total assurance for IBC Review

ICRP Automation Powers Tribal Modernization

ILINX ICRP helps your nation replace manual processes and achieve better funding outcomes.

Resource Utilization for Optimal Results

Financial staff can shift from manual preparations to strategies that grow Tribal revenue.

Year-Over-Year Efficiency Gains

ILINX ICRP creates compounding annual gains. Early setup builds the base, and preparation time drops each year.

Process innovation made easy.

ImageSource makes process innovation easy through advanced solutions built on ILINX, the world's most flexible process-improvement platform, delivered by a team of experts committed to customer-partner success.
