99.9% risk reduction for email and web based threats

Email phishing scams and user interaction with malware remain the major cause of cybersecurity breaches. ILINX Bouncer Cyber Defense brings state-of-the-art email and web content protection by applying our patented Frisk digital content sanitization process in real time to incoming emails and web downloads, ensuring web and email content is inspected and secure. ILINX Bouncer stops 99.9% of zero-day and advanced threats before they reach susceptible users.

Bouncer
CYBER DEFENSE™

Patented Orchestration Process

Seamlessly integrate ILINX Bouncer Frisk technology with risk content detection, ensuring thorough inspection and safeguarding your data from email-borne threats.

Disarm and Reconstruct Content

Unlike pattern-based detection that needs up to 72 hours to identify malware patterns, Bouncer uses Content Disarm & Reconstruction (CDR) to remove malware of any age, even zero-day threats, neutralizing risks before users can open attachments.

CRIS Cyber Risk Insight Score

Gain actionable insights with a complimentary analysis of your organization's cyber risk exposure, empowering smarter security decisions.

Technical Highlights

1. Patented Frisk sanitization process for all incoming email
2. Content Disarm & Reconstruction (CDR) for zero-day threat detection
3. 99.9% malware protection efficacy
4. Cyber Risk Insight Score (CRIS) for an in-depth look at your risk exposure
5. Easy bolt-on integration with Microsoft 365 and Barracuda solutions
6. Integrates with virtual browsers such as Garrison ULTRA, Authentic8 Silo, and others

Use Case #1

Malware and ransomware protection.

Use Case #2

Phishing and business email compromise defense.

Use Case #3

Ensure safe hybrid work collaboration.

Process innovation made easy.

ImageSource makes process innovation easy through advanced solutions built on ILINX, the world's most flexible process-improvement platform, delivered by a team of experts committed to customer-partner success.
