

Hyperautomation, meet hypermobility.

In a 24/7 world, digital experiences extend beyond the office, and you can't put operations and customers on hold until you can handle business in person. ILINX Mobile applications enable on-demand engagement between your staff, partners, customers, and constituents. Mobile makes it easy to initiate and follow-up on processes, intake needed documentation, review and approve requests, and much, much more—anytime, from anywhere.

24/7 mobile capture

Most processes are driven by supporting documentation. In today's digital-first climate, that shouldn't mean a trip to the office. Enable stakeholders to submit necessary information quickly and easily on their own terms. Mobile connectivity gets things moving quickly.

Mobile process innovation

Empower your team, wherever they are, to participate in key processes as well as if they were in the office. ILINX Mobile and Mobile SDK enable your workforce to review requests, capture documents, submit information, and complete tasks—all using familiar mobile devices.

No-code configuration

Configure your mobile experiences without coding, including the ability to customize with your organization's own branding. Add logo, colors, and other elements to create an experience that blends seamlessly with your existing identity and web applications.

Technical Highlights

1. Works with multiple mobile devices such as phones and tablets
2. Captures data using eForms or from hardcopy documents
3. Controls camera on device to automatically create and crop images
4. Integrates with line of business software to process captured data
5. Customizable design enables Mobile SDK to blend with brand assets

Home Health Care Client Intake

Accept insurance information onsite and process without delay to begin care immediately. Secure electronic transmission assures HIPAA compliance.

Loans Processing

Meet deadlines and fund loans faster by enabling agents and applicants to collect documents anywhere.

Service Authorizations

Initiate contracts in the field and collect eSignatures to authorize services.

Process innovation made easy.

ImageSource makes process innovation easy through advanced solutions built on ILINX, the world's most flexible process-improvement platform, delivered by a team of experts committed to client-partner success.
